

KRIBLE KRABLE

Vi undersøgte os
over hvordan en
Bønkebidder kan
vende sig om og
hvor hurtigt.

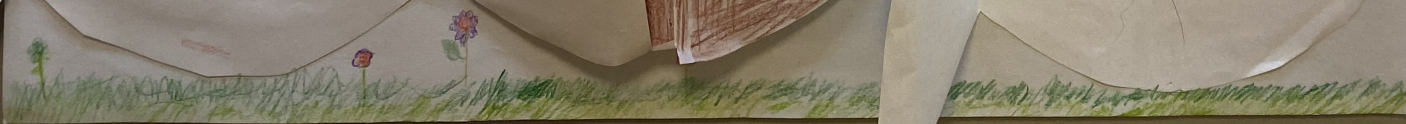

Mathias

Vi fandt ud
af at Bønkebidderen
hurtigt kunne vende
sig om på skråt
tegrang.

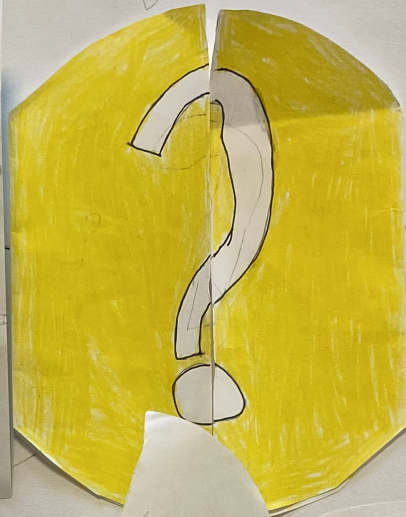

det var
sjovt at finde ud
af alle de spændende
ting. og gå ud i
skoven at finde dyret
var os sjovt.

Kribbe kribbe

Vi gik ud i naturen og gik på jagt efter dyr. Vi fandt 53 bænkebidere.

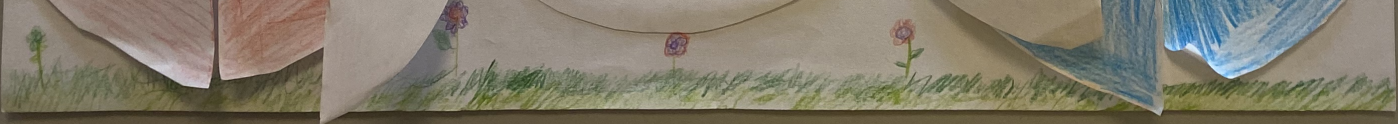

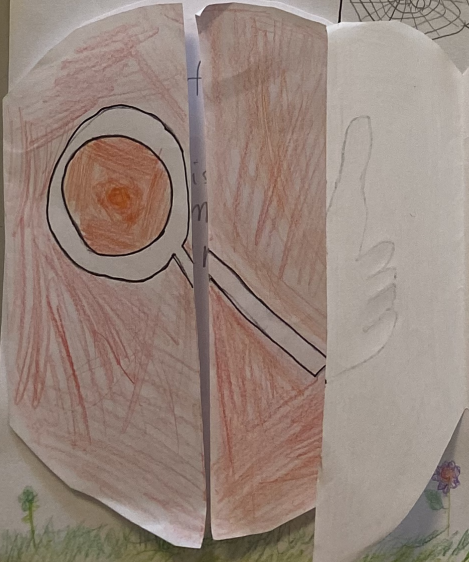

Vi lavede en plan og planen var at vi skulle samle 10 bænkebidere og vandre dem på røgen og tjegede hvordan og hvor hurtigt de kunne vandre sig om.

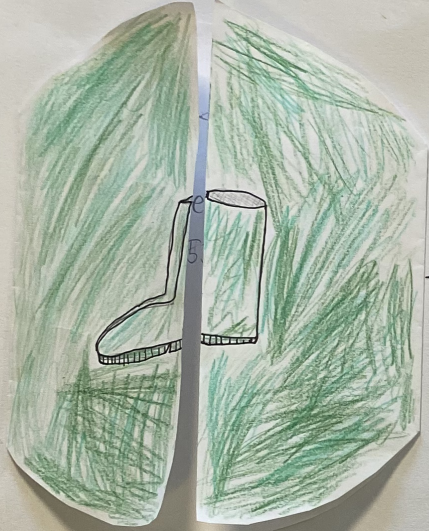

Mathias

Vi troede at bænkebidere kunne vandre sig om på blødt tegræs.

Vi fandt ud af at vores hypotese var forkert at det var skråt tegræs og ikke blødt tegræs. og på skråt tegræs tog det 30 sek. på det hurtigste tidspunkt.

Molly

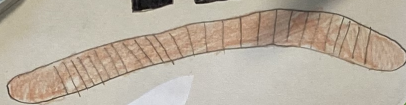

KRIBL

vi undre os over hvor hurtigt en bænkebidder kan vende sig om på forskelligt terren

KYLE

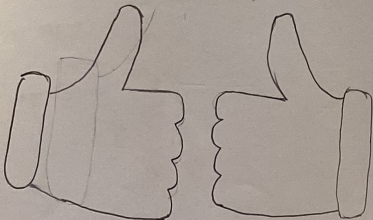

Vores plan er at vi laver et lige, skråt og bølgede terren og tæster 10 gange så fxb. ved lige er 3 sek. flest gange. så det er resultatet.

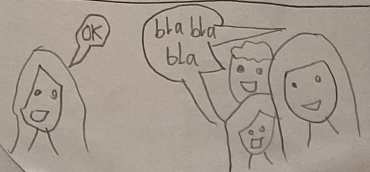

**EDITH
KLARA
JOHANNES**

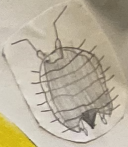

vi fant ud af at vores Hypotese var rigtig fordi den vendte sig hurtigt på skråt

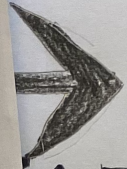

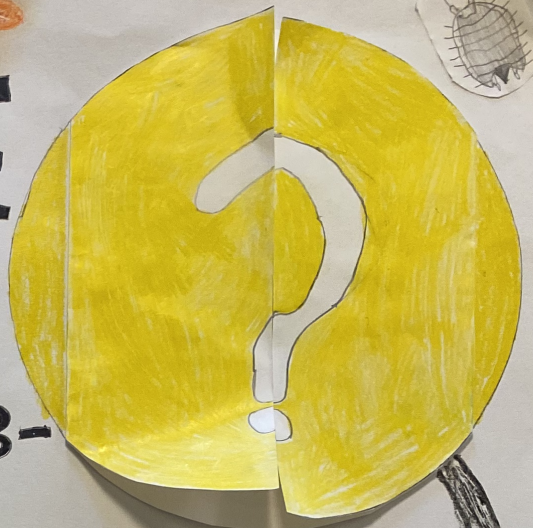

vi vil fortælle at vi var på tur i rød vad og fandt en masse spors mål vores spørgsmål var var hurtigt en bænkebidder kan vende sig om

KRIBL

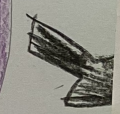

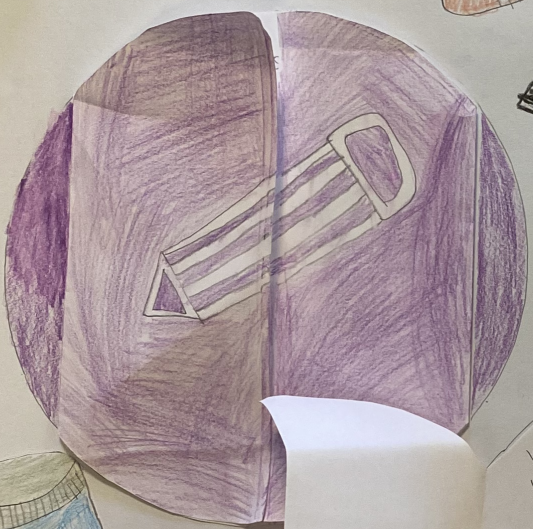

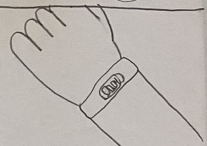

vi tog til rodkvæd
og fant forskellige dyr
i skoven og fant
spørgsmål ud fra dyrene vi
fant

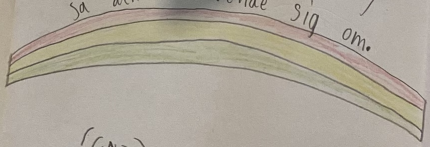

AB-

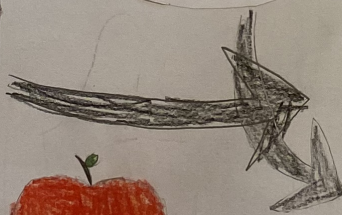

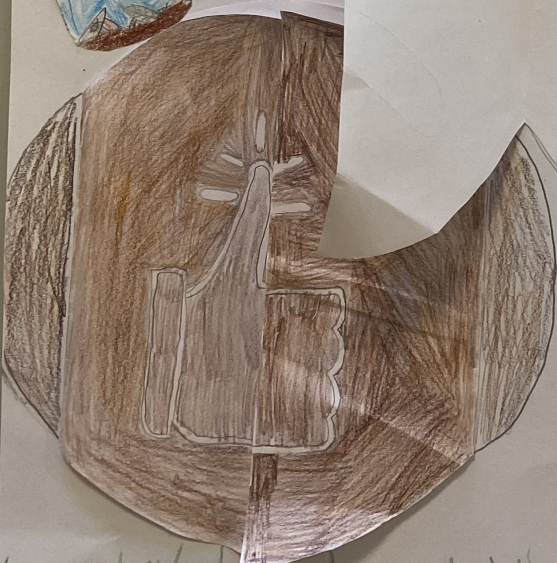

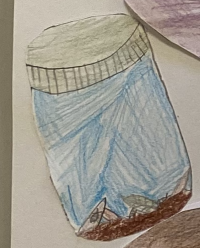

vi tror på at
bæltebider kan venne
sig på 3-5 sek. !!

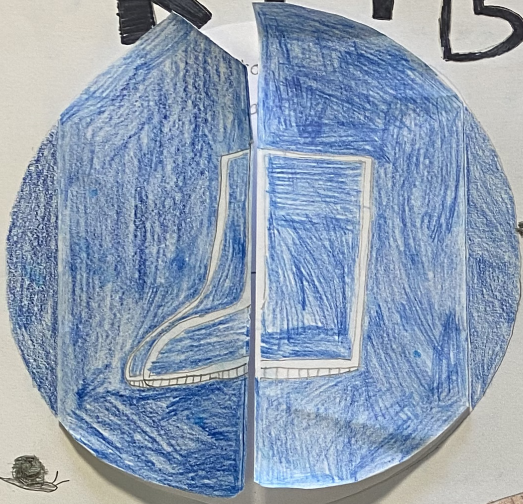

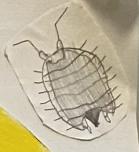

vi fant en bæltebider
Vender sig ved at våge sig
så den kan vende sig om.
